Product Fact Sheet

PKFM

PKFM Ford Transponder Override -Upgradeable (revised XK04)

UPC:	093207062568	**Brand:**	XpressKit	**Upgradeable:**	Yes
Weight:	0.27kg	**Product Series:**	SOLEX	**Universal Kit:**	No
Dimension (LxWxH):	294.64 x 355.60 x 99.06				

New hardware design for superior 2006-2009 Ford & Mazda coverage

PKFM is the new & improved upgradeable Ford/Mazda data transponder override. PKFM is based on the best selling XK04 platform but improves on the coverage of 2006-09 vehicles with several hardware upgrades including an integrated relay. Like XK04, PKFM is preloaded with PKFORD firmware, and data interfaces directly with the PATS module to temporarily override the factory immobilizer when remote starting.

Product Description:
PKFM Data immobilizer override interface is preloaded with firmware(PKFORD) covering all types of Ford vehicles. PKFM interfaces directly via data wires of PATS module to temporarily override the ignition immobilizer when remote starting while maintaining the integrity of the anti-theft system when the remote starter is not in use.

Features:
Preloaded with the latest firmware covering the most popular vehicles Built-in D2D port (data to data) for easy upgrades and programming Dual purpose D2D communication port also connects with D2D enabled remote start systems Upgradable Enhanced security when using D2D secure single wire data override Wire to Wire compatible with any brand of remote start and security system (W2W) Compatible with manufacturer's factory anti-theft system NKR-no key required for operation means vehicle owner does not have to give up a key Simple, straight forward instructions and programming means time saving installs.

What is Included?
- PKFM control module - 10 PIN Wiring harness - 4 PIN D2D cable (DIRECTED) - instruction guide
